

Khushbu P.

Sr. Java Developer

Profile

Java developer with 3.2 years of successful experience in web development. I have extensive Java working experience with an application software development team in the industry. recognized consistently for performance excellence and contributions to success in the web development industry.

Strengths in backend, frontend, and user interface development backed by training in web technologies like Java, Bootstrap 3/4, MySQL/MSSQL, and other similar web technologies.

Professional Summary

- Around 3.2 years of professional experience in analysis, design, development, and testing web and distributed n-tier applications using Java and JEE technologies in areas such as Insurance, Financial Services, Healthcare, and Telecom.
- Expertise in designing and developing various web and enterprise applications using technologies like JSP, Spring, Spring Boot, Thymeleaf, and REST-based Web Services.
- Distributed Application Development and Object-Oriented Programming (OOP).
- Expertise in Spring Application Framework, and Web development technologies like AJAX and Object Relational Mapping Technology like Hibernate.
- Extensively experienced in architectural issues and their solutions using various design patterns such as MVC (Model-View-Controller), Template, Factory, Builder, DAO, DTO, and Dependency Injection.
- Extensive experience in Spring Framework along with Hibernate for managing Database interactions.
- Expertise in the entire Software Development Life Cycle (SDLC) in Intranet and Internet applications.
- Developed DAO classes in the persistence layer using Spring and Hibernate for DB interactions.
- Developed One-Many, Many-One, One-One, and Many-Many entity mappings using annotations in Hibernate.
- Strong Experience in HTML, CSS, Javascript, and AJAX.
- Experience in java web services.

Professional Experience

Sr. Java Developer

2020 – present

- Designed, implemented, and tested the Spring Domain Model for the services using Core Java.
- Developed presentation layer using JSP, HTML, DHTML, CSS, AJAX, JavaScript.
- Involved in the implementation of applications using conventional design practices (Web-Service Oriented Architecture, MVC-Model View Controller).
- Integrated springs framework with Hibernate that is used for Database operations.
- Collaborated on design spec reviews together with Business Analysts.
- Have worked on MySQL database for storing and retrieving the application data.
- Involved in web component design and development using the spring framework, JSP, and Servlets.
- Involved in loading and storing objects using Hibernate.
- Involved in configuring Hibernate mapping file.
- Was responsible for communicating with the End client to support the application and analyze the issue and fixed the issue.
- Worked on SSO to integrate security for user authentication.
- Managed tasks and acted as point of contact for off-shore team coordination.

Skills

Java

Java, Spring, Spring Boot, Hibernate, JSP, Thymeleaf, RESTful API

Version Control

GitHub, Bitbucket

DevOps

AWS, Github Actions

Database Management

MYSQL, MSSQL, MongoDB

Front End Skills

HTML, CSS, Javascript, jQuery, AJAX, Bootstrap, ECMA Script

Projects

Healthray [↗](#)

Healthray is a platform for doctors to keep their private, secure, and personal medical health records at ONE secure platform. Doctors can manage their data, book an appointment, add patients, generate bills and do much more.
